**Tricky Tracks** is not your ordinary cat vs. mouse challenge. Leaving behind footprints makes a world of difference as you play; the SEEKER must track them; the RUNNER leaves them behind and both teams must cleverly use them to their advantage. You can play with a cast of different heroes each with their own unique look and individual abilities. Are you more of a nimble and stealthy cucumber, or rather a strong and persistent robot or are you the smartest Detective in Old London? Each team has unique and fun skills! As a RUNNER it is all about confusing the other team. You can lay fake tracks, rewind back in time to choose a different path and hide in props that are scattered around the map. It is up to you how you turn the footprints you leave behind into your strongest weapon against the SEEKER! On the opposing side, as a SEEKER you must keep a clear mind! Don't let the opposing team fool you. See through the tricks they are playing on you and hunt them down as fast as possible. When playing as a SEEKER, the game offers you special abilities which the other team does not have. With them, you have tactical advantage.

**Tricky Tracks** includes a collection of maps brimming with diversity: you may opt to play in a cartoony looking *Kitchen Map*, that is frozen in time; or perhaps you prefer to roam in the dark,

misty alleys of *Old London*; maybe you want to try out the vastness of the *Industrial Map* or dare to explore the undergrounds of a *Dwarven Dungeon*. Whatever your preference, these and more maps are waiting to be explored and mastered.
