'The Puppeteer' Coming To PC Via STEAM™ Offers A Fun & Challenging Pixel-Art Action Adventure With RPG Elements

"A Punishing Pixel-Art Platformer About Puppetry And Potions!"

London based indie game developer **Danny Martin** is proud to announce October 18th 2023 as the official worldwide release date for his debut game, **The Puppeteer**, a retro-inspired pixel art adventure with RPG elements coming to PC via STEAM™. Two years in the making, **The Puppeteer** challenges you to traverse various lands seeking to piece together the methods and madness of an evil antagonist puppeteer.

The Puppeteer is a fun retro-inspired game full of enemies, unexpected surprises, and many secrets to uncover. Enemies are numerous and as you progress, the more you will need the aid of potions to survive. Using the unique potion crafting system, everything from healing to speed to damage output can be enhanced by the brews that you master. You have many options on what to mix in each potion and you can use that to build your own strategies. Your exploration will eventually lead to hidden areas full of surprises and you will have the chance to learn more about the characters as you play. How much you explore and who you rendezvous with will have a direct impact on what ending you receive should you complete the game, as there are multiple endings to unlock.

The Puppeteer features crisp colourful graphics and intense arcade-style action. Master your potion crafting skills to survive and eventually find the secret hideout of the evil puppeteer! Enjoy five increasingly difficult levels riddled with hordes of enemies and baddies, and for the true adventurer, there is a host of fun achievements to unlock.

KEY FEATURES
- Intense arcade-style action.

- Pixel-art graphics and atmospheric music.

- 5 diverse levels to explore.

- Unique potions crafting system to aid in your survival.

- Multiple endings to unlock.

- Achievements for alternate completions of the game.

The Puppeteer is available via STEAM™
